

Dear our Partners,

This has been a good moment for me to share with you an update about HMP and Chibobo community. On behalf of HMP and the entire Chibobo community I would like to appreciate your generous support that has been offered for nine years. It's clear that HMP will emerge a decade of receiving sponsorship in May 2013 from Australian people such as Overnewton Anglican Community College, St Mary's Anglican Church and individuals from Melbourne. This journey has not been easy for HMP to run the Organisation with many difficulties condition at the ground. It's at this point that I appreciate to our almighty God who has Protecting, Guiding, Loving and few Mercies on us. I thank that He has been at our side especially to me who took over in 2007 after the death of our late Director who was a founder. I made a promise to him before he died that I will take care of his Children, HMP and the entire Chibobo community. Dear brothers have given all my best to ensure that HMP reach at this stage although we have a long way to go. We have achieved many successful projects that have cherished the Community and our Country at large. Today have something to share from what I promised to him such as.

- Orphanage
- Chibobo Rural Health Centre
- Koala women club
- OVC secondary sponsorship
- Night School
- Humanitarian Aid
- College Sponsorship
- Transportation
- Farming
- Mechanics
- Chibobo Secondary Construction

Dear Brothers as we are approaching to a decade of running an Orphanage have something to say

about. *I wish my late Director was not taken so that he witness the Orphans he left how they are today and also how his legacy has continued just like the way he wanted the orphanage to be.* It has not been easy from the time I took over the Orphanage. During my last discussion I promised him that I will fully take care of orphans to my best of my sympathy and to the interest of achieving his legacy and goals. This year 2013 in May HMP will emerge a 10 years of running Chibobo Orphanage. I am thinking of putting a date when HMP will have a celebration of decade running Chibobo Orphanage and OACC Sponsorship. During our first opening meeting this year we proposed to be in June when the OACC will be in Chibobo. To you our Sponsors I do not know how to appreciate for decade support that you have been to Chibobo.

A journalist from ZNBC Musonda Lombe visited Chibobo Orphanage. I had a discussion with her about HMP projects and she was shock to hear the developmental projects that have been taken by HMP without be covered by the journalist. She managed to get script from me and orphans. The scripts she collected so far has been on ZNBC radio three times and I was happy to receive calls from all over our country asking about how our children performed during her interviews. My script will be televised on Sunday.

It has been honour to our sponsors that we have managed to care 60 orphans in the boarding, 11 Secondary School Sponsorship and 270 non boarders since 2007 despite being in rural area were its

difficulty to run Orphanages. Our children are model to the community in respect, good behaviour, Love, spiritually, grown up and looking beautiful.

So far four grade 7 who sat for exams have passed to grade 8. We have two who have passed to Ibolelo High School and we have engaged in discussion with pupils and the guardians about our concern of them going to Ibolelo High School which is a day school while Chibobo has been given grade 8 this year.

The most difficulty level of education for an African child is Primary school. At this level a child do not have interest in school therefore, we insure that we motivate this children in many activities such as feeding them well, entertainments, Sports, Playground, Good accommodation, and counselling. The first class to write exams was in my administration and now they are going in grade 11 this year. What a big achievement so far, HMP its now achieving its vision of *uplifting the living standard of OVCs in Education Support*. They are lot of work involved in running Orphanage and it has not been easy.

CHIBOBO HEALTH CENTRE.

This project was so frustrated to me and to you sponsors. This was due that there was no consultation from the health building department on how the clinic was to be built. This resulted the Clinic structure after completion not to meet the standard Clinics in Zambia.

The opening of the Clinic was not easy but it involves me to travel and baggy from high offices. I engaged many stakeholders to assist the Chibobo people to have a health centre. Frustration and anger became the only solution because many people put pressure on me. Seeing people dying on their way to the main hospital was so painful to me therefore, this forced me to offer all I had just to ensure that the clinic is opened. The community loosed interest when the Clinic will be opened on not until Gods time came.

Today we all have something to smile that the health centre it's now saving not less than 80 people for a day and malaria has become a huge problem in our area. Unnecessary deaths have now reduced and the community are now happy. This is another achievement of HMP through your generous support.

Chibobo Rural Health Centre has been approved for this year Construction. The Government of Zambia this year will construct 650 Clinics country wide and Chibobo its one of them. I confirmed from the District Director Of Health

and Provincial Inspectors of Clinics. The construction will begin in May after rain season and Chibobo will become a big Clinic. Your highly Contribution towards this Clinics has enable Chibobo to Have a chance from the government to consider it.

CHIBOBO SCHOOL

HMP was running a school from grade 1 – 4 with three teachers. But HMP failed to proceed with a

school due to limited financial in future since it was supposed to continue employing more teachers and creating more classrooms for next grades. Therefore, this forced HMP to agree with the Ministry Of Education to transfer all the pupils who were at HMP to a government school with condition attached. The condition of the agreement was HMP to construct 7 teachers' houses in order to support accommodation for more teachers. So far HMP through Sponsors funds we have constructed seven (7) teachers' houses. In 2007 when I came inn there were only 2 teacher's houses

that were completed and have managed to complete the agreement of 7. Also the renovation of a classroom has been already done although HMP was to construct a 1x 3 classroom block for Chibobo primary school.

KOALA CLUB.

The Koala Club has an important role in to the widows and the Orphans at large. The club has been intervention of OVCs care and support also the women empowerment. The Club which is in profit making through different business activities it has assisted its own members financially by granting them shares and loans. The Club entered into loan scheme last season October from the Funds that was granted by the women empowerment programme also the funds they have in their account. It was my role to write a proposal to the Ministry of Community Development for women empowerment funds. So far koala has received twice funds from the government of Zambia on which the first funds was 2 million kwacha from youth and sports the second was 5 million from women empowerment. The 25 members of Koala there have granted a loan which will be paid after selling their produce. This has helped the members to secure food for themselves for next year and for the income to their homes. Koala club so far they are holding a 4 certificates awarded by the Ministry Of Agriculture where by three of the certificates are District competition during district agriculture show and one is at block show. These certificates are really helping the Club to be funded by the government.

The Club this year received agriculture inputs from Food Support Programme. This has enabled them to grow one hacter of Maize which is an income generating. The club which opened up the centres it has challenges in empowering them due to lack of transport and limited funds to other members.

Thank you to Mr mike Lampard who has offered a college sponsorship to Angelah Chibale who is now in training in Tailoring and designing and computer lessons. Angelah will complete her course next year in May 2014. The duration of the course is 1year 4 months. She will come and be a trainer to all centres in tailoring and design also she will facilitate computer lessons to the Orphanage. Thank you to the sponsorship funds.

SECONDARY SPONSORSHIP

The secondary sponsorship has become one of the major projects at HMP. This project it has drawn lot of interest to many parties on how we are assisting Orphans. After the broadcasting on ZNBC

interview many people have been asking how HMP manage to offer sponsorship especially how we came up with an idea of sponsoring them into boarding schools. So far our office has received lot of application for sponsorship. This project has encouraged the community and the district. HMP through the sponsors they have ploughed back into the community through this project which has become a direct benefit of the community. We have different sponsorship in Zambia but HMP its offering 100% sponsorship which is good.

To create good communication with students HMP has a strategy of monitoring and meetings with orphans. During meeting we discuss the difficulty they are facing and how we can improve them also counselling is done during this time. Monitoring has been very vital to know the performance, behaviour and the relationship of Orphans to their teachers. These have helped Orphans to remove trauma by being always to their side.

So far the 11 students who were the first to sponsors are now gone into year 11 successfully without any one drop out. We thank to our sponsors and the school management who have been close with this children. To other part of sponsorship we have one girl who has drop out from school due to a pregnancy. This girl she was under adra-kafhi sponsorship at Ibolelo High School which is a day school. I have regretted that we did not picked her under Australian Sponsorship as we have only two girls and the lest are boys in order for us to save her from what has happened. The school results will be collected during the meetings at school which I need to attend in the coming two weeks in all schools. We shall be able to update our sponsors about the performance of them. I hope I will be there when they will complete year 12 so that I celebrate with them.

HUMANITARIAN AID

Our Organisation participated fully to aid the community in different areas. These has helped the community to unity and work together. HMP which was the only centre which had transportation in Chibobo community I was working tiredness to help our community in transportation especially when they have patients. So far Chibobo residence has bought vehicles which has become helpful to the community. HMP participated to the community in treatments and disasters.

The first treatment was for Joshua Chibuye who was sent to Australia for a club feat treatment. This boy was in Australia for 8 months and the operation was successfully. I played my role to ensure that all required logistics are put in place until his journey was successfully. After he came back he was granted a full sponsorship although he failed to write grade nine exam last year due to unknown reasons. This also was one of the development that a journalist failed to understand why we were not covered by ZANIS that we have in Serenje. Joshua last year managed to write Exams and we are waiting the results to be out as see if has passed.

The second treatment was for Dyson who was very sick of being polarised of his two legs. He was at the point of losing hope of walking again but after I asked help from you I was given .The treatment of Dyson was not easy with our environment. University Teaching Hospital was the only high health institution that offers high treatment. Due to be the biggest Hospital they have lot of cases and it was not easy they only offer appointments for you to be considered for treatment.

The other Aid was Reagan Tayali Disaster that happened mid last year was their house was burnt completely and lost everything they had. It was so difficulty to me to offer help so i asked for help from you and I was given. Today there have Iron sheets to their house food was burnt and clothes for them and one has returned to school. Dear brothers this help is beyond our expectation and I thank you once again.

Food Security Programme it's one of the project that HMP has brought back to Chibobo after it was the contract was terminated by the Ministry of Agriculture. After applying to the Ministry the community has benefited this year

agriculture inputs. This programme its now running by HMP on behalf of the community. This is line of HMP objectives to support the community in agriculture. So far 60 members who are terminally ill, widows headed households, Vulnerable, Orphans have benefited from this Project. This project it's also a direct benefit of the community where they were not paying anything to have this inputs worth 1.5 million each. But they will require to pay a loan in full of 260,000 after selling there produce in August 2013.

COLLEGE SPONSORSHIP

In Zambia education is the only key to succeed in life. So far six (6) has been sponsored through funds from our Partners in Australia. Out of six, five are working three are under Ministry of Education and two in private companies.

Again another sponsorship for a tertiary education has been awarded to HMP which has seen Angela Chibale been offered. She served HMP for six years and she deserves to be awarded the sponsorship. She was very hard work and her missing from our management has left a huge gap in our working system. Angelah now she is in Ndola with MMM training in Tailoring and designing. I have managed

to secure her accommodation at MMM although we need to be paying every month end. I am thinking Angelah to do some short courses while being there at MMM. courses like Information and Communication Technology and Secretariat. This will be very beneficial both to Chibobo community and HMP Chibobo Orphanage in future. We are expecting her to come back after completing her course in April 2013 but she will be coming during holidays at HMP. Am very happy that she has eventually awarded this sponsorship

although I and HMP will miss her service and we shall all benefit from her training at last as she is a faster learner. More appreciation goes to late Mother of Mike who made this funds available that we save many women who will benefit from Angelah's service after completing her course.

FARMING.

It is one of the project that has been boosting HMP financially from the past three years despite financial difficulty. Am looking forward to see some well-wishers coming to aid into this activity. Since we have financial struggle this project cannot be self-sustainable since every revenue that was collected was going towards HMP financial supplements. So far this project cannot pay my salaries since the revenue it's always collected once per year after selling the produce. If we can have some well-wisher we can expand more business in agriculture to boost farming.

MECHANINCS

It has been one of the project that we have failed despite having a company certificate and the Land that was given. I worked so hard to ensure that it becomes successful but due to limited logistics it was very difficult for me to continue but only to rank it as the last project to consider.

CHIBOBO SECONDARY SCHOOL CONSTRUCTION

When I visited Miloso Secondary School last year which was under construction I was encouraged and gave myself a hope that we also can do it.

The 1 x 4 classroom block that was constructed by the World Servants from Netherland who were on the site in August and September last year in two groups did a great Job. The Secondary School construction we be a biggest achievement in providing education facilities near to Chibobo community just like the way Miloso has done.

Last week I visited our Board Chairperson to discuss some critical issues that have surrounded HMP and managed to discuss with him about Miloso Secondary if it will be

opened this year. He told me that it will be opened they have done a lot in preparation although they are waiting for Provincial Office (PO) to come and recommend and officially opening. Despite facing interfere from the government imposing high school fees that will see vulnerable children failing to pay. So far the government has made an order to all boarding schools in Central Province to charge school fees at 800,000ZMK each.

So far Chibobo Community and HMP have contributed a lot into the project. HMP has been in for front in facilitating this project by contributing through Organising meeting with the community which has a good impact in working together. We have been funding the community with Food to eat during working in all sections since they work from morning until late afternoon. We Organised a High school committee which has been looking after 10 sections that are surrounding HMP. HMP also has been contributing financially in terms of labour

and fuel during fetching water for making bricks. The opening of the Chibobo Clinic has also contributed a lot for community members to have faith that even High School in Chibobo one day it will be there. Through this major contribution has enabled the community to work hard in this project. So far bricks for the Houses were completed late November. The boundaries have not yet done due to unlimited funds. The boundary we require the surveys to come and that's when the processing of the title deeds can began. The boundary from the community it's already they but this Land needs to have title deeds from Ministry Of Lands.

The School will be very beneficial to Orphans, Vulnerable and to Serenje District. About 15 Primary Schools will benefit especially that this year is the last year for all basic schools next year there will be no Grade 8 in these schools but only grade 9. Therefore, we shall have another problem if we don't work hard and ensure that the school is constructed. At the moment the Government has not yet shown interest on coming for aid into this project. But am pretty sure that if we start this project the government will be drawn there attention and come for help just like what they have done for the Clinic. Mainly it's quite difficulty for our government to come for help at the moment due to lack of resources and political influence. So far all High schools are now secondary schools even Serenje Technical School have now grade 8 classes.

NIGHT SCHOOL

The school has been helping the Chibobo resident which has let us to see four women and one men sat for grade 9 exams last year. Although it has not been easy for them but they have a great passion to be great leaders and achieve high in education. The Grade 9 exams results are now released by next week Monday 28th they will be in schools. We are very interested to see how these five will do from this exams and which way they will go. The Orphans who sat for grade 9 also we shall have results on Monday 28th includes Joshua Chibale. This will determine if he will be under sponsorship. This year we are very interested in girls since from the grade 11 sponsored students, only two are girls yet we have still experiencing early marriage and school dropping due to financial constraints. Therefore, our attention will shift to serve more girls than boys to sponsor although our Office already has received 70 application from different community.

CHIBOBO CHRISTIAN COMMUNITY CHURCH

The Church has been having difficulties in running. But now am very happy that our God has answered our prayers we have an Evangelist from Lusaka who has come to help the church. So far he has been with us for two weeks and I have seen lot of changes in our Church. Am engaging HMP to support this man of God as he has testifies his call to Chibobo church and I would like to support him. It will be difficult for him to stay without financial support and have to give what I have. I had a meeting with him twice and his still under my assessment before committing into support him. Next week I will be meeting the CCC Church to discuss what they need HMP to do for them.

TRANSPORT

Transport continues to be a biggest challenge to HMP which has continued and hinder to deliver some services. HMP it's wider and we have lot of things to do while we only rely on one Vehicle which is a wagon. Every project to be successful logistics such as transport is very vital because you can do anything without it. When introducing a project you need to travel our country it's still far to develop. You can not only complete your discussion successfully without meeting that person. For instance during apply to MMM last year late 2011 I failed because I was relying in communication which fails to work until last 2012 I travelled to meet them and complete my mission that have let us to see Angela being in School. There are lot things that we need to do for the Orphans for them to be motivated since they are still young but we can only deliver once we have good transport. The above activities can not only rely on one transport that is used by a Director.

We need to start looking into this issue critically and take it seriously because more projects will be difficulty to operate if we do not tackle it.

Lastly but not the list, it's my pressure to thank everyone who have been praying for me and HMP. The starting of 2013 it has not been good to me and to my family. My working condition has been so difficult. Have stopped going to School due to financial problem. I was supposed to go for residential this January but I cannot afford to pay my tuition fee. It has been difficulty for me and my Wife as she is also pursuing a degree like me. I decided to support her first since we cannot manage both of to pay tuition fees. The Universities has increased the tuition fees. My father is suffering from stomach cancer which has been bothering me a lot. The business of Bicycles also has contributed highly to my problem. He has been so helpful to me and to my family if anything will happen to him my life will be disturbed. I did not pay much attention to my work in December and January. Although am in this situation am very grateful for the support that has enable HMP to run many projects with difficulty condition. Have given what I can and thank you that God has been strengthening me in all difficulty. Please I am asking everyone out there to pray for me as am finding a better idea what to do.
